

Duration: 1 Month

About the Program

It's a 25-Session Skill Enhancement & Interview Prep Journey to Get You Hired.

Struggling to get shortlisted or crack DevOps interviews even after learning the tools?

You're not alone. This exclusive program is specially designed for candidates who have already completed a DevOps course but still lack confidence, clarity, and real-world readiness.

We don't teach from scratch - we **polish**, **push & prepare** you to get hired.

Real Struggles of DevOps Learners

Most students complete a DevOps course, but still struggle to get hired. Why?

- Poor Conceptual Understanding They've learned the tools, but don't know the why behind them.
- No Structured Knowledge Random videos and incomplete notes lead to a scattered understanding.
- Lack of Real-World Practice No hands-on project experience or exposure to real use-cases.
- Weak Communication Skills Unable to explain projects or answer questions confidently.
- Generic CVs Resumes don't match job roles or highlight real skills.

Program Highlights:

1. Deep Conceptual Clarity

- Real-world explanation of Open Source Tools, Linux, Docker, K8s, CI/CD, GitOps, IaC, DevOps Lifecycle
- Why, Where, How of each tool used in projects (Git, Jenkins, Docker, K8s, Terraform, Cloud)
- Practice of Important Widely Asked Interview Questions on each and every tool.
- · Practice of Scenario Based Questions.

2. Hands-On Scenario-Based Practice

- Real-world Problems and Practice tasks to clear the concepts.
- Mock problem-solving
- Common issues faced in production
- Projects Hands-On to add on to your CVs.

3. Resume Building & Optimization

- One-on-one resume fixing
- Job-oriented keyword placement
- Role-based CV structuring (DevOps Engineer, SRE, Cloud Engineer)

4. Interview Mastery

- 5+ mock interviews with detailed feedback
- HR + Technical round preparation
- Real questions asked in companies like TCS, Infosys, Wipro, Startups, etc.

5. Communication & Confidence Building

- English communication drills
- How to explain projects confidently
- Handling unexpected technical questions
